

Izabela Moreira Germer de Lima

Systems Analyst // Front End

SUMMARY

I am a 4+ years experienced System Analyst focused on Front End. I like to solve problems through technology, code quality, and UX. Also, I love to work with agile methods such as Scrum and to be part of a multidisciplinary team, which you can improve together. Currently looking for a new job, since me and my husband (and our dog!) will move to Amsterdam this year.

PROFESSIONAL EXPERIENCE

Venturus - Front End | Oct 2018 - Present

Currently working as a Front End developer, using technologies like: AngularJS 1.6, Jasmine with Karma for Unitary Tests, JSONSchema, Mocks, Swagger, Gruntjs, CSS3 and HTML5.

Using SCRUM as agile methodology and JIRA. Also, CI/CD through the Jenkins pipeline and environment running Docker with Kubernetes.

Talent Invest - Front End | Jan 2018 - Sep 2018

I've worked in the construction of the system for investments and P2P financing using technologies such as HTML5, SASS, CSS3, Flexbox, Bootstrap 4, Grunt and Javascript.

Stoom - Front and Back End | Jan 2016 - Dec 2017

Web commerce implementation and maintenance.

I worked with the following technologies: Java Spring with Struts, Hibernate, PostgreSQL in the Back-end. In Front End: HTML5, CSS3, Vanilla Javascript and jQuery;

Besides that, I had the opportunity to create and monitor A/B tests, Landing Pages, using Hotjar and Google Analytics.
