Izabela Moreira Germer de Lima

Systems Analyst // Frontend Developer

SUMMARY

I am a 4+ years experienced System Analyst focused on Frontend. I like to solve problems through technology, code quality, and UX. Also, I love to work with agile methods such as Scrum and to be part of a multidisciplinary team, which you can improve together.

PROFESSIONAL EXPERIENCE

Venturus - Frontend

OCTOBER 2018 - PRESENT

Big international project to build a system that remotely update sim cards using technologies like: AngularJS, Jasmine with Karma for Unitary Tests, JSONSchema, Mocks, Swagger, Gruntjs, CSS3 and HTML5. Using Scrum as agile methodology. Also, CI/CD through the Jenkins pipeline and environment running Docker with Kubernetes.

Talent Invest - Frontend

JANUARY 2018 - SEPTEMBER 2018

I've worked in the construction of the system for investments and P2P financing using technologies such as HTML5, SASS, CSS3, Flexbox, Bootstrap 4, Grunt and Javascript.

Stoom - Front and Back End

JANUARY 2016 - DECEMBER 2017

Web commerce implementation and maintenance. Worked with the following technologies: Java Spring with Struts, Hibernate, PostgreSQL in the Back-end. In Frontend: HTML5, CSS3, Vanilla Javascript and jQuery; Besides that, I had the opportunity to create and monitor A/B tests, Landing Pages, using HotJar and Google Analytics.

Starcorp - Frontend

APRIL 2014 - DECEMBER 2015

Worked on different projects from intranet sites to sites like health, entertainment, and education. Knowledge used such as HTML5, CSS, Javascript, and jQuery.
